Alternative Fuel Vehicles Fleet Sales Manager*

2010 Nissan

Cars

NISSAN ALTIMA Building on previous generation Altima's reputation, the 2010 Nissan Altima is evolutionary in design, but revolutionary in its platform. The 2010 Altima comes to market as a sedan or coupe. The Altima offers CVT™ (Continuously Variable Transmission) with manual shift mode, a choice of 3.5-liter V6 or powerful 2.5-liter inline 4-cylinder engines, and a long list of technology features – including standard Intelligent Key, and available Dual-zone Automatic Temperature Control (ATC) with in-cabin microfilter and rear vents and Bluetooth®.

NISSAN CUBE The shape of things to come. Say hello to a cube that's extremely well-rounded. From a unique wrap-around rear window, to a cool curvy dash, it's high style filled with loungey accommodations. Loads of accessories let you personalize inside and out. It's fun to drive and easy to love, while getting up to 28 city/30 highway mpg. With the security of six standard air bags and Vehicle Dynamic Control. It starts with a 122-hp 1.8-liter DOHC 4-cylinder engine. Move up to the 1.8 S, 1.8 SL, or Krom for even more amenities.

NISSAN MAXIMA The 2010 Maxima delivers the thrill of a sports car with the sophistication of a premium sedan. Maxima offers 290hp from its V6 engine. Match all this with a Continuously Variable Transmission (CVT) and the result is more power and more efficiency. You can unlock the door and start the car all with the touch of a button. Nissan Advanced Air Bag System with dual-stage front supplemental air bags comes standard.

NISSAN SENTRA A standard 2.0-liter 4-cylinder engine comes standard in the 2010 Sentra. Depending on the model you chose, you'll find either a standard 6-speed manual transmission or fuel-efficient Nissan Xtronic CVT (Continuously Variable Transmission) inside for responsive handling. Inside the spacious cabin includes a 60/40 split double-fold rear seat, all-season tires, and Nissan Advanced Air Bag System with dual-stage front supplemental air bags with seat belt sensors. Sentra is also available with a wide range of unexpected amenities, ranging from the luxury of suede or leather-appointed seating to the convenience of Nissan's Intelligent Key keyless entry system.

NISSAN VERSA The 2010 Nissan Versa is the next generation small car with lots of space, plenty of horsepower, great fuel economy, and surprisingly high-tech amenities. Go up to 400 miles after fill ups. Stay in the green with up to 33 mpg. Versa even goes 100,000 miles before needing a tune up. Six air bags come standard. The available 60/40 fold down seats make it easy to handle people or cargo or both.

Trucks

NISSAN FRONTIER Frontier Crew Cab comes equipped with a 261-hp 4.0-L V6 engine and up to 6,500 lbs max towing capacity. For 2010, Frontier comes in either King or Crew Cab body configurations with your choice of model types. The Frontier includes a number of features shared with the Nissan Titan, including its rugged suspension design, Utili-track bed channel tie-down system and fully boxed, all-steel frame based on the Titan's F-Alpha platform. Frontier includes a Nissan Advanced Air Bag System which includes dual-stage front supplemental air bags with seat belt sensors and occupant classifications sensor.

NISSAN TITAN Titan is full-size power, all truck, and no compromise. The 2010 Nissan Titan is available in King Cab and Crew Cab body configurations with a choice of 2WD and 4WD. The 317-hp 5.6-L V8 Endurance engine produces up to 385 lb. ft. of torque. Titan has an available maximum capacity towing of up to 9,500 lbs. Titan comes equipped with a fully boxed ladder frame, outstanding off-road capability, standard 4-wheel Anti-lock Braking System (ABS), and independent double-wishbone front suspension. Other available options include the bed-organizing utility of Utili-track Channel System, spray-on bedliner, and extendable tow mirrors.

Minivans, Crossovers & SUVs

NISSAN ROGUE The 2010 Rogue offers crossover versatility to Nissan's lineup. The available all-wheel drive, smooth gearless transmission, and assertive engine make Rogue a flexible driving option. Rogue's sleek exterior nearly eclipses the surprising roominess inside. Available features include xenon headlights, fog lights, auto-dimming rearview mirror, and power sliding and tilt moonroof with sliding sunshade, just to name a few.

NISSAN MURANO The AWD Murano shows off its sculpted curves and well-crafted interior. The 3.5L V6 engine delivers 265hp. Powerful and refined for smooth performance, the Intelligent CVT means virtually gearless shifting. Murano keeps drivers safe with its standard Vehicle Dynamic Control (VDC) and Nissan Advanced Air Bag System – including standard roof-mounted curtain airbags. All passengers can enjoy a comfortable ride with the available Dual Zone Auto Temperature Control (ATC).

2010 Nissan

NISSAN ARMADA The 2010 Armada comes in SE, Titanium, and Platinum models. Armada's 5.6-liter, 32-valve Endurance V8 churns out 317hp and 385 lb. ft. of torque. And with the Flexible Fuel Vehicle (FFV) option, the Endurance engine strikes the right balance between get up and go. Continuously Variable Valve Timing Control and a high-flow intake maximize every gulp of air for power and gas mileage. The Flexible Fuel Vehicle (FFV) option allows Armada to run on ethanol E85, standard gasoline, or any mixture of the two fuels (not available in all states). Safety is top of mind for the Armada and available side-impact supplemental air bags are built into the front seat, so they move with you. The 4-wheel Anti-lock Braking System (ABS) combines with Electronic Brake force Distribution (EBD) and Brake Assist (BA) to help provide maximum braking power in any situation.

NISSAN PATHFINDER Pathfinder's V8 and V6 are as smooth as they are strong, even at high RPM. A 5-speed automatic transmission is geared to make the most of Pathfinder's muscle. An independent double-wishbone front and rear suspension offers quick response, plus improves passenger comfort, especially in the third row, by helping absorb bumps. A frame featuring high-tensile-strength steel – 90% stronger and 22% lighter than conventional steel – creates a solid platform. Two- or four-wheel Limited Slip (ABLS) automatically redirects power to the wheels with the most traction. The third row folds flat to open plenty of cargo room.

NISSAN XTERRA Xterra comes with power, roominess and utility. The 2010 Xterra continues to offer excellent off-road performance, 261hp 4.0-liter V6, and 5,000 lbs. of maximum towing capacity. Continuously Variable Valve timing delivers peak efficiency and on-demand power. The available, easy-to-use Utili-track Cargo Channel System makes stowing a cinch. The 60/40 split rear seats and available fold-flat front-passenger seat accommodate almost any cargo. Xterra's standard Electronic Brake force Distribution (EBD) adjusts braking based on additional cargo or passenger weight so you're always in control.
