CARVE OLAF AND BRUNI PUMPKINS

Cut the excess paper around the design, and tape to the pumpkin. Fit pattern around the pumpkin by creasing the paper or cutting slits into areas that do not contain design elements.

Using the poking tool, poke holes into the pumpkin around the pattern. This creates a dotted line guide for your carving saw to follow.

Ask an adult for help when cutting. Work from the center out, starting with the smaller details first. Leave larger shapes for last to maintain stability while you carve the details.

Remove pieces after you've made all your cuts, push or pull them out. Larger sections should be cut up for ease in removing.
